### PURDUE BURIES DePAUW IN ONE-SIDED CONTEST

LAFAYETTE, Ind., April 24.—Purdue overcame DePauw, 21 to 0, today in a miserable exhibition of baseball. The Boiler Makers whaled DePauw's pitchers at will. Rafferty was knocked out in the fifth inning but Dunn, his successor, fared no better. The game was one of the slowest ever staged on Stuart field and was replete with errors and miserable playing. Loy got into some bad holes frequently but was always able to pull out safely. Score:

Purdue.....0 0 3 3 2 5 3 5 \*—21  
DePauw.....0 0 0 0 0 0 0 0 —0

Stolen bases—Harris, Ebert, Finn 2. Sacrifice hit—Kistler. Two-base hit—Kistler. Double play—Walter to Bruckmann. Hits—Off Rafferty, 8; off Dunn, 8. Struck out—By Loy, 9; by Rafferty, 4; by Dunn, 1. Base on balls—Off Dunn, 3; off Loy, 5. Time of game—2:20. Umpire—Goodman.

### MISS VERA ETHEL FISHER WEDS DePAUW GRADUATE

Sunday morning at 8:45 at the home of the bride's mother, Mrs. Jennie Fisher, on south Indiana, occurred the marriage of her daughter, Miss Vera Ethel Fisher, to Mr. Roy J.

Colbert, of Toledo, Ohio. The ring ceremony was used, the Rev. B. D. Beck officiating. The young couple stood before an arch twined with apple blossoms. Miss Fisher was lovely in an exquisite dress of white charmeuse, with bridal wreath in her hair. Brick ice cream and cake were served after the ceremony and Mr. and Mrs. Colbert soon left for Toledo. For traveling the bride wore a handsome suit of Belgian blue wool poplin.

Mr. and Mrs. Colbert were well remembered by their friends. Besides presents of cut glass and china there were many beautiful pieces of handwork of various kinds, each expressing the individuality of the giver.

Mr. Colbert has been re-elected recently to his position as instructor in sociology in the University of Toledo at a substantial increase in salary.

After May 9 the young couple will be home at 887 west Bancroft street, Toledo.

## THE MAY TERM DOCKET IS SET

JUDGE HUGHES SETS DATE FOR MANY OF THE CASES WHICH WILL BE DISPOSED DURING THE MAY TERM OF COURT—THE COURT ATTACHES ARE ENJOYING A WEEK'S VACATION.

## THE JURIES ARE DRAWN

Judge James P. Hughes of the Putnam Circuit Court has set the docket for the May term of court, which convenes next Monday morning. The March term ended Saturday and the court attaches will enjoy a week's vacation before the opening of the next term.

The jury commission drew the following juries this morning:

**Grand Jury.**  
John Prichard.....Mill Creek Tp.  
John W. Evans.....Warren Tp.  
Marion Farrow.....Greencastle Tp.  
W. S. Meek.....Jefferson Tp.  
Saul Marshal.....Madison Tp.  
A. A. Black.....Greencastle Tp.

**Petit Jury.**  
John Quinlisk.....Madison Tp.  
W. S. Hamrick.....Washington Tp.  
Thomas J. Heady.....Madison Tp.  
Clarence Horn.....Jefferson Tp.  
David T. Brothers.....Franklin Tp.  
Lewis Newgent.....Clinton Tp.  
George W. Lewis.....Monroe Tp.  
Robert W. Day.....Marion Tp.  
G. R. Huffman.....Washington Tp.  
George Whittaker.....Warren Tp.  
James K. Davis.....Greencastle Tp.  
W. C. Dorsett.....Mill Creek Tp.

The May term will open with the trial of Clem McCammack, a young man of near Belle Union, who is charged with the shooting of James Sims, a laborer of south Greencastle. The charge against McCammack is manslaughter. The trial is expected to attract much attention and several days' time probably will be taken to finish the case. The docket was set by Judge Hughes is as follows:

Monday, May 3—State vs. Clem McCammack.

Monday, May 10—Howard vs. Anderson.

Wednesday, May 12—Jacob L. Nelson vs. Vandalia Coal Company.

Friday, May 14—Fred V. Thomas vs. Gilbert Ruark.

Friday, May 14—Jackson Boyd vs. Hiram C. Allen, et al.

Monday, May 17—Feeley vs. The Central Indiana R. R. Co.

Wednesday, May 19—J. H. Hedges vs. T. W. Sullivan.

Thursday, May 20—Emma D. Sage vs. Jacob S. Cole.

Monday, May 24—Letitia D. Johnson vs. Lewis N. Dooley, et al.

Tuesday, May 25—Ludwig Piano Co. vs. James L. Hamilton.

Wednesday, May 26—State of Indiana vs. Hunter.

Thursday, May 27—Jacob K. Rodeman vs. Aldis Hutchens.

Friday, May 28—Asher vs. McDonald.

Monday, May 31—G. M. Umversaw vs. Thornburg Milling Co.

Wednesday, June 2—Mary A. Osborne vs. Jane Fitch.

Thursday, June 3—Roy M. Brackney vs. Adams Express Co.

Friday, June 4—Yearling vs. Baker.

Monday, June 7—Delia E. Rowe vs. May Hart, et al.

Wednesday, June 9—Beard vs. Harris.

Friday, June 11—Stringer vs. Stringer.

Monday, June 14—Stella E. Vaught vs. McCammack.

The oil well on the Marion Clodfelter farm in Russell township will be finished the last of this week or the first of next week, according to Phil S. Fenn, promoter of the oil operations. The rig started drilling Friday and now are down two or three hundred feet. This well is the second of four that will be sunk by the Putnam Oil & Gas company. It is probable that the rig will be brought back to Monroe township after the Clodfelter well is completed. Should the drill be brought back to Monroe township, a well will be sunk to the depth where the first strata of oil sand was found in the Miller well. The well will then be shot and the production of the oil strata may be determined. It is believed that the wells will be productive when this strata is shot.

Mrs. Sylvester, who resides north of this city in Monroe township, is reported critically ill.

## TWENTY-TWO OUT FOR MAY QUEEN

MANY ALREADY HAVE BEEN NOMINATED IN THE GREENCASTLE BOOSTER CLUB MAY DAY CELEBRATION MAY QUEEN CONTEST—VOTE BALLOTS PUBLISHED IN THE DAILY AND WEEKLY PAPERS.

## PRIZE FOR THE WINNER

Twenty-two candidates for May Queen have been nominated in the Greencastle May Day Festival Contest. Greencastle, Bainbridge, Roachdale and Cloverdale already have candidates and many others are expected to be nominated within the next few days.

Each candidate nominated has been credited with 1,000 votes. Ballots will be published each day in the Greencastle daily papers which will credit candidates with 25 votes. Ballots in the weekly papers in the county will count for 100 votes.

Twenty dollars in gold will be given to the young woman who is elected May Queen. The candidate who is leading in the contest May 1 will be given \$5 in gold.

The candidate having most votes at 6 o'clock p. m. April 30, will be given a bonus of 500 votes. The candidate having most votes at 6 o'clock p. m. May 5, will be given \$5.00 in gold. The contest will end at 6 p. m. on Wednesday, May 12.

The event is given in connection with the great May Day celebration which will be given under the auspices of the Greencastle Boosters' Club in Greencastle on May 15. Every reader of this paper should clip the vote coupons each day and save them for some candidate.

The event promises to arouse much enthusiasm. The votes will be counted three times each week and the standing of the candidates published. Ballot boxes will be placed in each of the banks in Greencastle so that ballots may be deposited there or they may be mailed to Ralph Confer, secretary of the May Queen Contest Department of the Greencastle Booster Club.

The candidates nominated, each credited with the 1,000 votes which is credited to each candidate nominated, follows:

### STANDING OF CANDIDATES.

Pecella Nixon.....1,000

An independent baseball team of this city went to Reelsville Sunday afternoon, where a game was played with the team of that town. The local boys were victorious in a ten inning contest, the score being 9 to 8. The first few innings of the contest was one-sided, the Greencastle team holding their opponents to only 2 runs, and piling up a big score themselves in the meantime. When the locals changed pitchers in the sixth inning the Reelsville team rallied and drew close up to their opponents. The score was tied in the ninth and an extra inning was necessary to decide the game. Greencastle scored one run in the first half of the tenth, and the Reelsville team was unable to work a single runner around the paths.

Miss Adelaide Thomas, Miss Kathryn Allen, Ross Runyan and James Walker motored to Blue Bluffs, a summer resort near Martinsville, in the Runyan machine Sunday.

## DEATH COMES AT AGE OF 94 YEARS

MRS. ELIZABETH F. OSTRUM DIES AT THE HOME OF HER SON, HENRY OSTRUM, ON EAST SEMINARY STREET SUNDAY EVENING AT 9:50 O'CLOCK—PRIVATE FUNERAL SERVICES.

## BURIAL WILL BE IN CANADA

Mrs. Elizabeth Foster Ostrum, 94 years old, died Sunday evening at 9:50 o'clock at the home of her son, Henry Ostrum on east Seminary street. General debility brought about by the infirmities of old age caused her death.

Mrs. Ostrum probably was the oldest resident of Greencastle. She has been in ill health for several years. Mrs. Elizabeth Foster Ostrum was born in Belleville, Ontario, Canada, October 13, 1820. She spent her girlhood days in that country.

Ten years ago, she came to this city and made her home with her son, Henry Ostrum, on east Seminary street. The latter is in California at this time, but will return home soon. The body will be placed in a vault in the Forest Hill cemetery and remain there until the arrival of Mr. Ostrum. Upon his arrival the body will be taken to Belleville, Ontario, where funeral services will be held and the interment made in the cemetery of that town.

Private services in charge of Dr. Demetrius Tillotson were held at the Ostrum home this afternoon at 4:30 o'clock. Only the members of the family and a few very intimate friends were present. The body was deposited in the vault at the Forest Hill cemetery immediately after the services.

## SIXTY PRISONERS NOW AT THE STATE FARM

Indian's new penal institution, the State Farm, at Putnamville, has been opened just two weeks today and just sixty prisoners had been received up to Sunday evening, which closed the first two weeks of the official life of the institution.

That the State Farm is proving popular with the judges of the state is evidenced by the numerous convictions during the past two weeks in which a State Farm penalty has been attached.

Indianapolis and Marion county, so far, have proven to be the most liberal in sending men to the farm. Six prisoners were received from Indianapolis Sunday, which puts its total to 12 men, just one-fifth of the total of prisoners received during the first two weeks.

If prisoners are received during the next few weeks at the same rate that they have been received during the first two weeks, the institution will be taxed to capacity in approximately 8 weeks. With the buildings now being completed Superintendent C. E. Talkington will be able to care for approximately 300 men.

As most of the prisoners received so far have been long term men, it will not take many weeks to fill the farm to capacity. Mr. Talkington and the trustees of the farm will start the construction of new dormitories as soon as possible. The one dormitory and the large dining room will be completed within the next few days.

The first two weeks have been eventful ones to the management of the farm. As the institution is the first of its kind in the state and one of the few similar institutions in the United States, the management has been kept busy in working out the details of caring for the prisoners received at the farm. This work, together with the regular farm and building work, has kept the men in charge busy day and night.

The tenth birthday anniversary of Miss Violet Henderson, the daughter of Prof. and Mrs. H. A. Henderson, was celebrated with a picnic party at McLean's Springs Saturday evening. Ten friends of Miss Henderson were guests and the evening was very enjoyable. The party met at the Henderson home on Seminary St., and chaperoned by Miss Florence Parker and Mrs. Henderson, went to the springs for the picnic.

Miss Emma Stoner visited in Indianapolis today.

## The Purdue Egg Show.

The Purdue Egg Show which is to be held May 4, 5 and 6 at Purdue University is an event which is unique in the development of agriculture in Indiana, since it is the only show in the country held exclusively for the exhibition of eggs. The six previous shows have been increasingly successful, but the present exhibition promises to be a top-notch as far as the number of entries and results accomplished are concerned.

There are two general purposes for which the show is held: first, to serve as an aid in improving the quality of the farm egg; second, to furnish a means of establishing a uniform standard of marketing and grading eggs. The improvement in quality will be accomplished automatically, if more producers can be led to study more carefully the good and bad characteristics of the egg itself; then, understanding these, be made to appreciate the advantages which will accrue to them if they can produce a high quality product.

It must be admitted that poultry shows have done more than any other one factor to bring about this careful study and appreciation of quality. There is every reason to believe that successful egg shows will accomplish the same end in regard to eggs. Likewise in the matter of uniform grading the egg show is accomplishing for eggs what the poultry show has already accomplished for the breeds and varieties of poultry. Perhaps there is no greater bone of contention among commercial handlers of eggs than this very matter of grading. But with such an experienced and successful man as Mr. Wyckoff of the Indianapolis Poultry Co., acting as judge, the standards set at the Purdue Show should be worthy the serious attention of all commercial dealers of eggs.

All entries will be divided into six different classes, so that competition for the many valuable premiums will be fair to all concerned. An excellent opportunity is given young people of high school age to enter eggs. Besides the \$25.00 Extension Trophy given to high schools exhibiting the best dozen eggs in that class, there are cash prizes awarded the persons making the exhibits. Several teachers of agriculture are taking advantage of this opportunity of increasing the interest of their students in poultry by holding preliminary shows and then sending their best eggs to Purdue.

Experiment stations in all parts of the United States and Canada, including California, Georgia, and Massachusetts, have written arranging to enter eggs in their class.

Anyone interested in the show is urged to write to M. C. Taylor, 222 Pierce St., West Lafayette, Indiana, for a premium list.

# CALLS ARITHMETIC 'USELESS STUNT'

University of Chicago Professor Draws  
Attacks When He Makes  
Declaration.

## HE SAYS GIRLS DON'T NEED IT

Only One Woman in 10,000 Ever Uses  
Mathematics of High School,  
He Says.

Chicago, Ill.—When Prof. Frank M. Leavitt of the University of Chicago asserted at the meeting of the Chicago Political Equality League at the Congress Hotel that arithmetic is one of the "useless stunts through which all school children are forced to go" he got into trouble.

"How about Abraham Lincoln?" asked one woman. "When he was President he asked why people studied geometry. He was told it was to improve the mind, and he took up the study of geometry."

"How about Ben-Hur?" asked another. "When he found that the men who rowed always on one side of the galley were being overdeveloped in some parts of their bodies and underdeveloped in others, he asked to be allowed to row on either side of the boat alternate days."

"Thinking about geometry does not teach you to think about political science," said Prof. Leavitt. "There is about one woman in 10,000 who ever used later in life the mathematics she is forced to study in the high school. It is hard enough for men. It is worse for women. We have got our school system loaded up with a lot of useless things."

"There is a boy in the vocational classes at the Lane High School who could get through sixth grade, but he knows more about wireless telegraphy than anyone in the high school including the teachers. He lectures to hundreds of other students. His lectures probably do not contain one grammatical sentence, but he will get that later."

## STRANGE SIGHTS AT A SMALL TOWN FIRE

Masked Firemen Rush from Dance to  
Fight Blaze—Clowns and Scare-  
crows on the Ladder.

Freeport, L. I.—A dwelling ablaze, children screaming, kings, princes, hoboes, fairies, and the like, cheering and groaning; his Satanic Majesty, red from the tips of his horns to the end of his dart-pointed tail, shouting orders through a speaking trumpet; a white clown and a scarecrow on the ladder, holding the nozzle and directing the stream into an upper chamber of the burning structure—this affords a scene never surpassed for oddity by the movies.

Wearing masquerade costumes, members of Russell Hose Company, named for Miss Lillian Russell, for more than an hour fought a fire in the home of Mr. and Mrs. Theodore Dixon, in Union Place, Roosevelt, not far from the Freeport line. The annual ball of the hose company was in progress when the alarm was sounded. None of the volunteer firemen stopped to change their clothes.

Esther Dixon, 6 years old, had been left in charge of her younger brothers, Edward, 3, and Theodore, 9 years old. She heard a crackling sound and found the second story, in which the boys were sleeping, was in flames. Crying through the smoke, she aroused and guided them to the street. She then telephoned for assistance.

With a clown and a Mephistopheles in the lead the Russell Hose made a record time to the fire, followed by a long line of maskers from the ball. In about an hour the fire was out, with the loss estimated at \$2,000.

Their costumes drenched, the members of the Russell Hose changed their uniforms in their engine house without going home, and went back to the dance. Mephistopheles, the foreman, immediately resumed the hesitation waltz with the stately Lady Macbeth, in which they had been so suddenly interrupted by the clang of the alarm bell.

## HILARIOUS COWL A DISTURBER

Night Cars Probably Named After  
This Jolly Old Bird

St. Louis, Mo.—Why anything so hilarious as an owl car should be named after so sober a bird as the ordinary owl has been a puzzle to some persons. Louis Kamper, of this city, says he has the answer. He has the kind of an owl that the owl car was probably named after. It is a jolly, laughing bird, that for noisy hilarity has Barnum's laughing jacks beat several blocks.

Instead of emitting a series of conservative hoo-hoo sounds, such as give the common owl his reputation for wisdom, Kamper's bird cackles out a blithe "ha-ha-ha-ha." He keeps this up about ten minutes without stopping, and requires but a few seconds for breath before he is at it again. Kamper's neighbors were kept awake a few nights, but now most of them have become used to the owl.

This owl also has horns, or feathery tufts which look enough like horns to be so called. It came from southwest Missouri, and Kamper hopes to interest the zoo authorities in it.

Lovers oft rush in where husbands fear to tread.

## RECORD OF THE PAST.

No Stronger Evidence Can Be Had in  
Greencastle.

Look well to their record. What they have done many times in years gone by is the best guarantee of future results. Anyone with a bad back; any reader suffering from urinary troubles, from kidney ills, should find comforting words in the following statement.

Mrs. Cora Sanders, Tennessee St., Danville, Ind., says: "I had terrible backaches and pains in the top and back part of my head. Learning of Doan's Kidney Pills, I began using them. In a few days the relief they brought convinced me that they were a good remedy. The kidney secretions became natural and my back was stronger."

## Re-Endorsement.

On June 4th, 1912, Mrs. Sanders said: "Doan's Kidney Pills have been used in my family and we have found them to be a good remedy for kidney trouble. I am glad to confirm my previous statement recommending them."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—as the same that Mrs. Sanders had. Foster-Milburn Co., Props., Buffalo, N. Y.

# BEATING BY WIFE NO DIVORCE CAUSE

Small Man Chastised by Big Woman  
Only Entitled to Sympathy,  
Judge Rules.

## THE WIFE IS GRANTED FREEDOM

Jurist Refuses to Hear Testimony That  
Mother Smoked Before  
Children.

Los Angeles, Cal.—Declaring that a woman may smoke cigarettes and still be entrusted with the care of her children and that a man of fragile proportions, who is chastised by a wife of Amazonian stature, is entitled to sympathy, but not a divorce, Judge Monroe adjourned the marital difficulties between Fred Shunko, wealthy furniture manufacturer, and Sarah Shunko.

A decree was given to Mrs. Shunko as a personal gift from the court, but not on either of the above grounds, which were the basis of the complaint brought by her husband. Judge Monroe also took the custody of the two little daughters from both parents and will consign them to some guardian or institution.

Here was the burden of the husband's complaint:

That his wife, whose form is molded on heroic lines, frequently beat him. That she chased him armed with a pair of scissors and threatened to impale him.

That she smoked cigarettes and abused him in the presence of their little daughters.

To which the wife retorted:

That her husband was habitually temperate and that her demonstrations against him were deserved.

Shunko took the witness stand and attempted to relate his marital woes. He produced three cartridges which, he said, he had taken from a revolver with which his wife had threatened to shoot him; also, he produced the fragments of a watch which, he said, she had seized and stamped on, and as proof of the charge that she had chased him with a pair of shears he exhibited the shears.

"Also tell the court about your wife's smoking cigarettes," said Mr. Shunko's attorney.

"I don't want to hear it," said Judge Monroe.

"I will never grant a divorce or take a woman's children away because she happens to smoke cigarettes," he said. "That seems to have become some what of a custom among certain rich and idle women and the canons of society do not lavish against a woman's privilege of smoking. If rich women may smoke I cannot forbid a poor woman from doing so; therefore, let us hear no more about cigarettes."

The court listened sympathetically to Shunko's recital of his woes, and then said:

"Under the law neither is entitled to a divorce on the evidence presented. However, I won't ask either to live longer with the other and will award a decree to the wife. From what the court has learned I don't think either is fit to raise these little girls. Therefore I will take them from the custody of both parents."

## CLOSE CALL FOR MERRYMAKERS

Incident Revives Talk About Dangerous Railroad Crossings.

Leslie, Mich.—There are three very dangerous railroad crossings in this village, points where all view of approaching trains is obstructed by buildings. Two persons have been killed and there have been frequent narrow escapes. The latest "close call" might have been a shocking affair.

Lee Rivard was driving a merry party to town Friday evening to attend doings at Odd Fellows' Hall. When near the railroad tracks on Mill street they were laughing and having a good time and forgot about the trains and tracks until one of them suddenly screamed, "The cars."

# The Stories of Famous Novels

By Albert Payson Terhune

## CRESSY

By Bret Harte

Cressy McKinstry was engaged. She and Seth Davis, her sweetheart, were still at school. And they calmly and openly went on with their lovemaking in the classroom. This was not especially good for school discipline and had a tendency to make the other pupils' attention stray from their books. So the young schoolmaster, Jack Ford, suggested that Cressy and Seth give up at once their scholastic careers.

It was a frontier school in a frontier community, at Indian Springs, Cal., in the early days. Cressy's father, a ranchman, first planned to resent Ford's interference by giving him five minutes to get out of town. But at Cressy's request the old rancher broke the engagement instead by the simple expedient of starting a blood feud with Seth Davis. And Cressy came back to school—alone.

She was a fluff-brained, gloriously beautiful girl. Of rough frontier stock, she had had a score of rural flirtations with men of her own class. Then she had fallen in love with Ford at first sight. That was why she had made her father break the Davis engagement. That, also, was why she had come back to school. Ford was a city man, educated, good-looking, clever. Vastly different from any other man she had known.

And Cressy was different, too, from any girl who had come into Ford's life. He had come to Indian Springs still smarting from a rejection he had received at the fair hands of a divorcee in San Francisco. And he used to keep the wound raw by reading and rereading the San Francisco woman's letters. But as he saw more of Cressy he forgot to read the other woman's letters as often as of yore. Then one night after a rustic ball he and Cressy told each other of their love.

Cressy's mother supposed the girl was engaged to a local local named Joe Masters, who had long been one of her admirers. Mrs. McKinstry favored the match because Masters was of the pioneer breed, like herself. "Old Man" McKinstry, a grim fire-eater, whose only weakness was his daughter, looked with pride on the prospects of her marrying so exalted a personage as the schoolmaster. Ford, while his sinner nature revolted from the thought of an alliance with such people, lived on happily in his Fool's Paradise. Cressy secretly read his innermost heart, but gave no sign of what she learned there.

At last came a rude awakening. Seth Davis, seeking revenge for his own rejection, stole from Ford's desk the Other Woman's letters. Uncle Ben Danner, a slow-witted miner who followed Ford around with a doglike devotion, learned of the theft and recovered the letters, but not soon enough to prevent Seth from telling the story broadcast. Then Uncle Ben learned, to his horror, that the letters were from his own former wife, a woman who had long ago deserted and

ward shunted to them. The horses jumped forward and the sleigh just cleared the track when the engine went whizzing by. Three of the occupants were thrown from the back of the sleigh, and the suction of the train almost pulled them under. Something should be done to safeguard these dangerous crossings.

## FAMILY RANGE BLOWN TO BITS

Woman Unhurt by Nearly Two Hundred Flying Missiles

Middletown, Pa.—Though fragments of an exploding kitchen stove flew past her in all directions as she was seated at a sewing machine, not three feet away, Mrs. Emmanuel D. Bamberger not only had a marvelous escape from death in the dining room of her home, at Highspire, but did not suffer even so much as a scratch.

Fragments, numbering nearly 200, of what once was a beautiful No. 9 range were showered through the air like shrapnel, creating havoc with everything in their path. Pieces of the stove gouged grooves an inch deep in the woodwork; the window in the out-kitchen was blown completely out; holes were cut through the plaster as if by a sharp instrument, and yet in all this rain of metal not one scrap hit Mrs. Bamberger. The loss is \$150. No cause is known for the explosion.

## Training an Oriental

A Canadian woman wanted to show her Chinese servant the correct way to announce visitors and one afternoon went outside her front door, rang the bell and made the man usher her into the drawing room.

The following afternoon the bell rang, and not hearing him answer it, she went to the door herself. To her surprise, he was standing outside.

"Why, Sing," she asked, "what are you doing here?"

"You fool me yesterday. I fooler you today," was the reply.

## Peace Assured

"Aren't there some jealousies in your progressive euchre club?"

"No, indeed," answered Mrs. Torbins; "when we buy prizes we are always careful to select things that no one really wants, so that the winner will not be an object of envy."

## diverced him.

McKis on the frontier were crude but strong. The news that Ford was corresponding with one woman and courting another sent a band of vigilantes to run him out of town. Ford challenged any man in the masked band to fight him single-handed. Old Man McKinstry stepped out of the group, unmarked, and accepted the challenge.

The duel was to be fought with rifles. Ford, knowing McKinstry was merely trying to avenge the fancied slight to Cressy, would not shoot at him. So when the word was given the schoolmaster fired in the air. Nevertheless, McKinstry fell to the ground, badly wounded.

Ford rushed to the fallen man's side assuring him that, some one else must have shot him; also that McKinstry had misjudged his motives toward Cressy. The old man was judge enough of human nature to see that Ford was telling the truth. And (when it was proved that the wound had been caused by a pistol shot fired from ambush by Seth Davis) Ford's name was cleared. McKinstry even forced his neighbors to lift the ban of suspicion from the schoolmaster and to let him remain among them as an honored citizen.

Monday morning, as Ford sat at his desk in school, wondering why Cressy had remained so mysteriously in the background after the duel and the other stirring events of Saturday, one of his smallest pupils piped up:

"Cressy McKinstry's left school. She's married!"

"Married!" echoed Ford, aghast, his face suddenly pallid and drawn.

"To Joe Masters," went on his youthful informant, "at the Baptist Chapel at Big Bluff, Sunday morning."

And the whole school chorused in delighted indorsement:

"Why, we knowed it all the time!"

BRET HARTE, whose full name was Francis Bret Harte, was born in Albany, N. Y., in 1859, and went to California in 1884. He opened a school in Sonora, but having failed both in this and in mining, he next became a compositor in San Francisco.

Sketches of his experiences among the miners attracted much attention, and as the result he joined the staff of The Golden Era.

He was secretary of the mint in San Francisco, 1884-70, and during this period wrote some of his most famous poems.

He founded and edited in 1868 The Overland Monthly, to which he contributed THE LUCK OF ROARING CAMP, THE OUTCASTS OF POKER FLAT, MIGGLES, TENNESSEE'S PARTNER, TRUTHFUL JAMES (The Heathen Chinee).

Returning to the east Bret Harte became a contributor to The Atlantic Monthly, and from time to time lectured in various cities.

From 1878-1885 he was U. S. Consul at Creffield and at Glasgow.

He then took up his residence in London.

# Kyanize

your old furniture

Make it look spick and span. You can do it yourself with this wonderful product, which gives floors, woodwork and furniture a beautiful, sanitary lasting finish.

We will give you FREE for a trial, a regular 15c can of Kyanize, if you buy one of these handy little 10c Chinese brushes to apply it with. Clear and seven popular colors. They all dry quick and hard and beautiful.

We will refund the 10 cents you pay for the brush if you are not delighted with the Kyanize

# A. COOK DRUG CO.

## Not III

Mrs. Jones went shopping one afternoon, accompanied by her husband, and as they emerged from a store after a busy session, hubby noticed that mother wasn't acting naturally. Beneath a spotted veil her face was undergoing a series of fearful contortions, twisting first to the right and then to the left.

"What's the matter, Mary?" asked the old man, in alarm. "Are you ill?"

"Of course not, silly!" answered the old woman, as the contortions continued. "I never felt better in my life."

"Then what in the world are you doing with your face?" wonderingly demanded father.

"What am I doing?" answered mother, exposing both hands, which were full of bundles. "Why, I'm trying to get my veil down over my chin."

## Farm Timber Sold Too Cheap

A representative of the department recently returned from the rich Maumee River region of northwestern Ohio, where he has been studying the problems of increasing the market for product and improving the forest wood lot. Just before he left, he asked one farmer if any timber had been sold from his place lately. The farmer replied very sadly that he had sold his timber that summer and that the buyer had got the best of him. When asked about the terms of selling, the farmer said that the buyer had lunged around for two months and after they had become very well acquainted, had assured the farmer that he could estimate the value of the timber very closely. He had then made an offer which the farmer had accepted without further investigation.

The sale was made for all the timber on the six and one-half acre wood lot for the lump sum of \$260. The trees were very tall, clean, medium-sized, high grade white and burr oak, with a few hickories. All were clear of limbs and were ideal timber trees. By estimating from the tops and the stumps which were left, the forester found that the tract showed a yield of nearly 14,500 board feet per acre. Allowing 10 per cent for possible defect, which is a liberal allowance for such a thrifty stand, the yield was something more than 13,000 feet. The average price of white oak stumpage per thousand board feet in this locality is \$17, though the high grade of timber on this wood lot was worth from \$18 to \$20. Figuring at \$17, however, the timber included in this sale was worth \$1,435 as it stood in the trees; or, in other words, the farmer had permitted the buyer to secure one of his valuable farm products for \$1,175 less than the farmer should have received.

The remedy for this condition proposed by the Department of Agriculture is that farmers, before they sell their wood lot holdings, should get in touch with the state forester or the state agricultural authorities, and secure advice as to what trees should be cut and, if possible, an estimate of the amount and value of the timber to be sold. Even when it is not easy to secure advice of a forester the farmer should at least get several bids before making a sale.

It should also be kept in mind, says the department, that the future value of the woodland tract depends on the way it is cut. To allow a local buyer to go in and take everything usually means the end of that wood lot as a source of money. On the other hand, if there is a contract which provides that certain desirable, young, thrifty trees be left to form the nucleus of a future stand, the value of the tract can be increased from one timber crop to another.

## Longleaf Pine Suitable

For Kraft Purposes

That longleaf pine treated by the sulphate process and properly handled will give excellent kraft pulps and papers, especially the very strong and very tough, lightweight brown wrapping papers, is the conclusion reached by the department of agriculture after a series of tests to determine the wood's possibilities as a source of pulp. This conclusion is of significance at this time, because war has cut off the German supply to this country. The high specific gravity of the wood and the resultant high yield of pulp per cord, says the department in a recently issued bulletin, give longleaf pine an advantage possessed by few other commercially important woods suitable for pulp making.

This new use for longleaf pine furnishes a means of utilizing the waste in mills, edgings and trimmings from southern mills. Tops and defective logs left in the woods and small logs which at present are converted into lumber with little or no profit would furnish a supply of raw material for pulp making even greater than that derived from the mill waste.

The tests were made at the forest service laboratory and were of two kinds, those to determine the effect of varying the cooking conditions in the sulphate process, and semi-commercial tests carried on by both the sulphate and the soda process. The sulphate process was found to be superior to the soda, at least so far as longleaf pine is concerned. In the former process the pulp can be very much undercooked and still produce a fair quality of paper, while a soda pulp can be made from it. The best sulphate kraft pulps were obtained with a total duration of cooking of only 3.5 hours, against 6 hours for the best soda pulp.

Sulphate kraft pulps of fairly good strength and toughness can be obtained from longleaf pine with yields as high as 61 per cent or 2,170 pounds of absolutely dry pulp per 100 solid cubic feet of wood. For the production of high grades of kraft wrappings the yield of pulp could be approximately 51 per cent, or 1,800 pounds of absolutely dry pulp equal to 2,000 pounds air-dry pulp per 100 cubic feet of solid wood. The yield per cord would be somewhat less than the weights given since an ordinary 4x8x8 foot stacked cord may contain from 75 to 100 cubic feet of solid wood.

The Forest Service is co-operating with 54 railroads, mining companies, pulp companies and cities in making tests of wooden ties, timbers, poles, piling and paving blocks which have been given preservative treatments.

Lodgepole pine, one of the principal trees of the Rocky Mountains, makes good strong wrapping paper and pulpboard.

It is reported that there is a big market in Hawaii for box shooks for packing canned pineapple and pineapple juice.

**Cause of Sleeplessness.**  
Sleeplessness often results from a disordered stomach. Correct that and you can sleep as well as ever. Mrs. Mae Ingersoll, Pulaski, N. Y., was troubled with indigestion and headache. "I was so restless at night," she says, "that I could not sleep. Chamberlain's Tablets were so highly recommended that I got a bottle of them and soon after I began taking them I was very much improved. Two bottles of them cured me." Obtainable everywhere.—adv.

## NOTICE OF ADMINISTRATION.

Notice is hereby given that the undersigned has been appointed by the judge of the Circuit Court of Putnam County, State of Indiana, Administrator of the estate of Mary E. Hopwood, late of Putnam County, Indiana, deceased.

Said estate is supposed to be solvent.

Dated this 23rd day of April, 1915.  
SUSIE HOPWOOD, Administrator.  
B. F. Corwin, Atty. 31 W. 4th St.

DR. O. F. OVERSTREET,

# Sky Scrapers In Chicago

DO NOT INCREASE THE  
VALUE OF PROPERTY IN

Greencastle Or  
Putnam County

Neither will they increase the earning or buying power of your dollar.

Or increase the opportunity for employment or increase the market for products of factory or farm here at home.

Nor will their taxes help maintain our home government, roads, streets, sewers, lights, schools and libraries.

Neither do their owners help maintain OUR churches or other benevolent or charitable institutions.

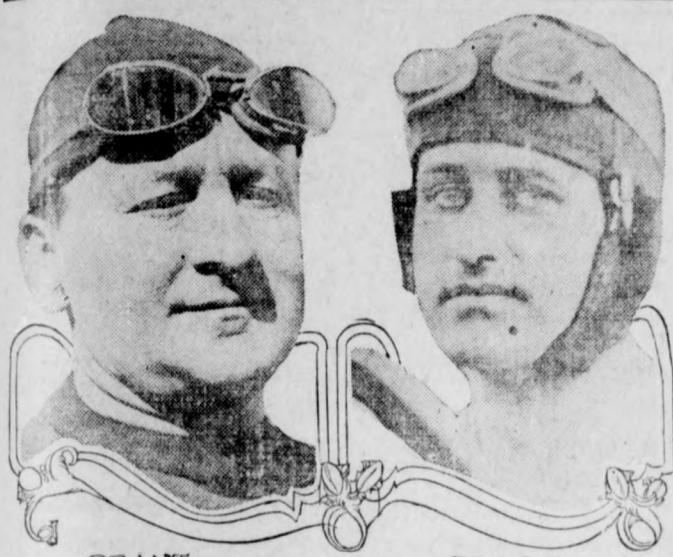

And who would think of calling upon their owners for co-operation in boosting any of OUR home enterprises?

Yet every dollar sent to Chicago for merchandise helps build sky scrapers in Chicago.

One concern up there has just let contracts for over \$50,000 worth

## REPRESENT EXTREMES OF RACING WEIGHT

GRANT

BRAGG

The heavy and light weights of the racing game, respectively, are Harry Grant and Caleb Bragg, who are scheduled to oppose each other, at the wheel of Sunbeam and Mercer cars, in the next Indianapolis 500-mile race. Grant is a tremendous man, physically, with a phlegmatic, slow going nature, while Bragg is just the opposite, small, wiry, and nervous. Both have been extremely successful at the racing game, Bragg having won the 1912 Grand Prize, and Grant the 1909 and 1910 Vanderbilts.

**Childrens Coughs and Colds.**  
Coughs and colds are the bane of childhood and cause mothers much more worry than any other of the minor diseases. Those who keep Chamberlain's Cough Remedy ready for instant use have less occasion to worry. Mrs. W. P. Agin, Bluffton, Ohio, says, "I always rely upon Chamberlain's Cough Remedy when the children have coughs or colds." Obtainable everywhere. adv

## NOTICE OF SALE OF ROAD BONDS.

Notice is hereby given that the Treasurer of Putnam County, Indiana, will offer for sale at his office in the court house in the City of Greencastle, Putnam County, State of Indiana, until sold the following road bonds, to-wit:

**Clinton Township Bonds.**  
J. O. Sigler et al road. Twenty bonds of \$718. each. Total issue, \$14,360.

All of the above bonds are dated May 3, 1915. The first bond and interest will be due May 15, 1916. The rate of interest will be 4 1/2 per cent. These bonds will be payable at the office of the County Treasurer, in his office in the court house in the City of Greencastle, Putnam County, Indiana.

Sealed bids will be received at the office of said county treasurer up to 2 o'clock on May 4, 1915.

H. H. RUNYAN,  
Treasurer Putnam County, Indiana.

## FISHERMEN TAKE NOTICE

We will give a Shakespeare Fishing Reel, Take Down Model, with Adjustable Jeweled Bearings to the person catching the Largest Bass with hook and line, and to the person catching the Next Largest Bass, under same conditions we will give a Bristol Steel Fishing Rod. These fish must be caught in Putnam County. For rules and conditions governing the contest call at  
J. K. LANGDON & CO.  
Greencastle, Ind.

## The Bitter and the Sweet

Life to most of us reduces itself to a quest of happiness, yet probably but one in a hundred attains the heart's desire. It is an old story that realization falls infinitely lower than anticipation.

Happiness is akin to love in that it often eludes pursuit; like love again it is also much a matter of temperament, for many who have apparently every reason (or, so we think) to be happy are unhappy, while others who ought by all rules to be miserable float joyously along on the bubbling sea of their troubles. Life indeed requires an art, and some of us declare that happiness is the whole of it.

All down life's high road we meet with those who calmly insist that it is but a matter of middle ways. Extremes are false, things not so dark as we fear nor yet so bright as we fondly hope. Carefully they tear off the buds with the thorns and assure us that the tree of life is but a smooth wand and that sorrow should not be ours any more than is unqualified joy. Doubtless their theory, supported by prudent arguments, makes for much placid comfort.

It must be gratifying indeed to be able to think, during those ghastly moments of darkness which come to us all at times, that we are not so unfortunate as we imagine, that somewhere, somehow, not far from us is the promise of radiant dawn. When the heart bleeds, when hops flies and a sense of loss seems our whole being, surely it must be good to say that misery does not exist, that by an effort of our will this apparent agony may pass, that all the pain is only of our fancy and that within lies the secret of its death.

Yet there is another side of this cold wisdom, and a question, born of this theory, insistently clamors for hearing. If we regard this rule as our refuge and comfort in trouble, must we not be consistent and measure all our joys and ambitions in the same same way? Must we not then curb that gladness which would leap in our hearts and when love and hope and the sense of pleasure make our pulses throb to bursting, must we not then apply this rule and declare that all this madness, all this exhilaration, all this passion of happiness is but a delusion, or, failing here, must we not lose the power to convince ourselves that misery does not exist? Else would relief from shadow rob us of sunshine—all our castles of delight would crumble before our longing eyes and all the charm of life be shorn with ruthless hand. Never to suffer—yes, but the price!—never to walk in the flowery way of life's great garden! Ah, who would choose? To forego the power of intense enjoyment, or, keeping it, retain a capacity for pain! For the glory of a few swift-passing joys, to wander at times through the dungeons of despair! Is the joy worth the sigh; is the pleasure so much greater, so much more compelling than its bitter aftermath of grief, that we can dare all for a brief spell of happiness?

And, can we choose? Can we so rule ourselves that we may order the very throbs of our faulty hearts?

It is so easy to preach, so difficult to follow a wise counsel. For countless centuries the normal heart has rebelled against the teaching of those whose temperaments make them insensible to sorrow, proof against joy and ever strangers to the keen emotions which wear and tear, but fill and glorify the lives of those who welcome them.

"The heart that is soonest awake to the flower is the first to be touched by the thorn."  
True! Every word of it. But is not the flower worth seeking in spite of thorns? Perhaps its petals are fairer, its glowing heart of gold but richer by contrast to the thorns which scratch and wound, resist, but may not wholly deter the eager hand which gathers it.

All that we look for, do we only find, for the eyes of the heart are sharp and clear, but never do they lie to us, and as we are born so do we suffer, rejoice or stagnate. All we may do is, at most, to accept the fashion of our temperaments and, in accepting, try to draw from them their best, for if it were not almost an impety to claim happiness as a right, it would be for some of us a futile prayer.

The right way to cook oatmeal: Put a teaspoonful of salt in a quart of water over the fire, in the upper part of a double boiler. As soon as it boils briskly, sprinkle the oatmeal in slowly. Do not stir but let it boil briskly for a few minutes, then set it in the lower half of the boiler, which should contain hot water; cover it and let it bubble slowly, without stirring, for four or five hours at the least. If wanted for breakfast it should be cooked the day before and then finished with as much time as you can allow in the morning.

Nut butter is a pretty good substitute for meat now that the latter brings such high prices. Run walnuts or shellbarks through a feed-chopper and rub into them about one-third as much good fresh butter.

In creaming butter and sugar, where the former is hard, never warm the butter. Warm the bowl or the sugar to make the butter blend. Otherwise the flavor and texture of the cake will be changed.

**Nervous Indigestion.**  
Mrs. J. F. Baldwin, Sandy Creek, N. Y., suffered a great deal from pains in the stomach due to nervous indigestion. She writes, "Chamberlain's Tablets relieved me right away, and by taking three or four bottles of them I was cured of the trouble and have not felt any of the old symptoms since." Obtainable everywhere.—adv.

## Worked Both Ways

In a case tried in a Philadelphia court the prosecuting attorney had a good deal of fun at the expense of counsel for the defendant, each of whom seemed as stupid as the other.

"Ignorance of the law," interposed the judge at a certain juncture, "is no excuse for violation of law."

"May I inquire of your honor," asked the prosecuting attorney, "whether your honor's remarks are directed at the defendant or his counsel?"

## Her Ancestry

In a speech in the Senate on Hawaiian affairs, Senator Depew, of New York, told this story:

When Queen Liliuokalani was in England during the English Queen's jubilee, she was received at Buckingham Palace. In the course of the remarks that passed between the two queens, the one from the Sandwich Islands said that she had English blood in her veins.

"How so?" inquired Victoria.

"My ancestors are Captain Cook."

## They Are Strangers Now

Mrs. Newed—"My husband, I regret to say, is a man of very poor taste."

Miss Singleton—"Well, you ought to be thankful that such is the case."

Mrs. Newed—"Why so?"

Miss Singleton—"Otherwise he would still be in the bachelor class."

## More Work for Lawyers

Dora—"Edith married a very nice man, I hear."

Clara—"He's nice enough, but it won't be long before there will be a divorce in that family. He is cross-eyed."

"What difference can that make?"

"She can never tell whether he is admiring her or some other woman."

## Again the Tempter

The sailor had been showing the lady visitor over the ship. In thanking him she said:

"I see that by the rules of your ship tips are forbidden."

"Lor' bless yer 'eart, ma'am," replied Jack, "so were the apples in the Garden of Eden."

## In Quest of Information

"I understand that you have called to ask for my daughter's hand?"

"Oh, no nothing like that."

"Then—"

"She and I settled all that. What I have called for is to find out what part of the house you are going to turn over to us when we are married?"

## Not at Home

Mrs. Crimps—"I wish to see Professor Salmagundi, the astrologer. I wish to learn if tomorrow will be a lucky day for me to start on a journey."

The Professor's Servant—"Very sorry, but the professor is dead. He was killed in a railroad accident."

## When Lawyers Disagree

Plaintiff's Counsel—"My lord, unfortunately in this case I am opposed by the most unmitigated scoundrel."

Defendant's Counsel—"My learned friend is such a notorious prevaricator."

Judge—"Will counsel kindly confine their remarks to such matters as are in dispute?"

Wife—"Who can doubt the power of woman's love! Think of the thousands of wild youths who have settled down into staid and respectable citizens as soon as they are married!"

Husband—"Good lands! They could not afford to be anything else after they got married."

## Trustee Notices

## WASHINGTON TOWNSHIP.

J. O. Mullinix, Trustee.

I will be in my office in Reelsville on Tuesday and Friday of each week to transact the business of the township.

## FLOYD TOWNSHIP.

Edgar J. Wilson, Trustee.

I will be at my home in Floyd township every Wednesday, to transact the business of my office.

## MARION TOWNSHIP.

Emerson E. Ruark, Trustee.

I will be at my home in Filmore on each Tuesday and Friday to transact the business as trustee of Marion township.

## GREENCASTLE TOWNSHIP.

Harry Talbott, Trustee.

I will be in my office in the S. C. Sayers Book store in Greencastle each week day, during my term of office, to conduct the business of Greencastle township. Phone 388.

## Cactus Solution in Making Sprays

An entomologist of the Department of Agriculture who had seen Mexicans add cactus to whitewash in order to make it stick to boards, derived from this the idea that cactus solution would make arsenical sprays for killing insects adhere to plants and thus protect the plants against insect ravages for a longer period. As the result of a series of experiments with the ordinary "prickly pear" or (Opuntia lindheimeri) Engelm., which is plentiful in the Southwest, it has been found that if sliced prickly pears, or indeed any other cactus of sufficient size, are added to the water before the zinc arsenite or Paris green and the lime are put in, the mixture will stick to the plants much better and be effective for a much longer period. The experiments were made with the cucumber and similar plants which are attacked by the belted cucumber beetle (Diabrotica balteata) and it was found that in regions where prickly pears are obtainable the method is excellent to prevent damage by insects with habits similar to those of the belted cucumber beetle, such as the twelve-spotted cucumber beetle, etc.

The method used was as follows: The spines were first burned from the prickly pears, then sliced at right angles to the spine or in cases of large pears, cut both ways. The sliced cactus was then put in water and allowed to soak over night. It was found that 15 pounds of spiny cactus to 50 gallons of water is about the proper proportion. Where too much cactus is used it interferes with the spray. The water over night draws out the magellanic substance from the cactus which makes the adhesive for the poisonous substances. Cactus grown on low, wet soil possesses less of this magellanic substance and more water than cactus growing in high dry regions. The latter is, therefore, preferable.

Another test was made with cactus solution as compared with whale-oil soap. Very careful notes were made and it was found that the soap equalled the cactus in spreading power but the cactus spray adhered better than the soap spray. Therefore the cactus was favored, since heavy dew will wash poison with slight adhesive qualities from the foliage in a short time.

The water from the cactus was drawn off, and with it in one set of experiments, were mixed 3 pounds of zinc arsenite with 50 gallons of water. This was used in sprays on sugar beet plants infested with the striped cucumber beetle. Check experiments showed that in about six days after spraying all the beetles were dead.

In another experiment one-half pound of Paris green and two pounds of lime were used with 50 gallons of the water of the cactus solution. Again the spray, within a few days, killed all the beetles.

Experiments were then made with lead arsenate and this, it was found, did not make a satisfactory combination with the cactus solution as it produced precipitation and coagulation, which interfered with spraying. The experimenters checked up their results by using solutions without cactus and using pastes or other forms of arsenicals. Following are their conclusions:

By the use of cactus as an adhesive not only do the arsenicals give better and more lasting results, but considerable expense may be saved in another way. In the Southwest, where all insecticide material must be shipped in from a great distance, the expense of transporting this material is often more than the cost of the insecticide itself, so that material of a poor quality is often used instead. For some years arsenicals in the paste form have been extensively used by fruit and truck growers on account of their better adherence and lasting qualities, but where a good adhesive is used the writer much prefers arsenicals in the powder form. In conducting experiments in the insectary and in the field at no time have the powdered arsenicals proved less effective and at times the mortality would be considerably above that shown in another experiment conducted at the same time with arsenicals in the paste form. Better results have been obtained in using 1 pound of zinc arsenite in powder form with cactus, than by the use of 3 pounds in the paste form to the same amount of water. Thus equal results may be obtained with a reduction of 65 per cent in express and freight charges, paid in securing arsenicals from a distance.

Zinc arsenite has been used both in the paste and powder forms with much success for the belted cucumber beetle, as well as for some other insects of this class. It has proved to be one of the most effective sprays for use in humid climates, as it appears to last longer. No other arsenical has given better results and in the majority of cases the mortality has been higher than with any other arsenical spray. The powder when used with cactus to make it adhere is to be preferred for general use over any arsenical now on the market. This spray in the writer's opinion surpasses in lasting qualities any of the arsenicals and at the same time gives a higher mortality. In action it is somewhat slower than Paris green, but it gives better results in the end. The writer would not recommend, however, that zinc arsenite be used on plants that are nearly ready for market, for the poison does not wash off easily.

Ferrous arsenate has given very good results, combined with cactus, to increase its adhesive powers. No serious effects from its use on the

most delicate foliage have been observed. The cost of the product at the present time places it beyond general use as an insecticide.

The cactus solution has a tendency to ferment, so that experiments were made to determine preservatives. It was found that the addition of dissolved copper sulphate in the amount of one pound to 28 gallons of the cactus water deterred fermentation so that the solution kept perfectly for about four weeks. The copper sulphate practically did not interfere with the effect of the arsenicals. Similarly it was found that the addition of one-fourth pound of salicylic acid to 56 gallons of cactus liquid or one-quarter pound of sodium benzoate dissolved in a small quantity of alcohol and added to 50 gallons of water preserved the cactus mixture.

## COW PEAS

Are Excellent For an Egg-Producing Food

Cow peas are not only relished by hens, but it is excellent egg food for them. One successful poultryman gives this experience. The peas, after matured, were harvested and stored in dry lofts, and thrown to the fowls in scratching pens, where they were scratched over and searched for during the whole day. After a few days the egg supply was visibly increased, and within a few weeks almost doubled that from an equal number of hens kept in separate quarters and fed on other grains. The hens seemed to like the small branches and leaves, and would eat every particle except the hard, stiff stems. The general health of the flock was excellent, and not a single hen showed the least symptom of ailment during the winter season. Considering the ease with which cow peas may be raised, it seems that everyone should give them a test as food for the poultry.

## Care of Milk and Cream

Milk, whether to be sold in its natural state or to be separated, should be removed from the stable immediately after milking. If it is not to be separated it should be cooled at once to a temperature of 50 degrees F. or lower and held there until disposed of.

The separator will produce cream of better quality than is possible with any other means of separation. If a separator is used, it should be thoroughly washed and scalded after each time it is used. If the milk is to be hand skimmed, it should be put into "shot-gun" cans for the cream to rise, and the cans should be well covered to keep dust and insects out and be kept in a room free from odors. This is better than putting the milk into shallow vessels.

The cream sours more quickly than rich cream. With a rich cream there is also less bulk to handle, more skim milk for feeding purposes, and the cream is in better condition to make into butter. It is desirable to skim the milk so as to produce a cream containing between 30 and 35 per cent of butter fat. A great advantage in using a separator is that the richness of the cream can be easily regulated. Cream sours very readily at temperatures above 50 degrees F.; hence it should be kept as much below this temperature as possible.

If warm cream is mixed with cold cream, the whole mass is warmed thereby, and souring will follow more quickly; therefore the newly separated cream should be cooled before adding it to the cream on hand. A thorough stirring each time newly separated cream is added to other cream will bring all to an even temperature.

The cream should be kept in a clean, well-ventilated place, in order that odors may not be taken up by it. If cream is sold to the ice-cream or retail trade, it should be delivered daily. If sold to the creamery, it should be delivered at intervals so frequent that it will reach the creamery in good condition. If properly cared for, cream need not be delivered oftener than twice a week in the winter and three times during the summer. Cream cans should be protected with blankets during delivery in the summer months, to prevent a marked rise in the temperature of the cream.

## Grit in Gizzard Assists Digestion

All food consumed by the fowl must pass from the crop into the gizzard, where it is ground and prepared for assimilation. Unless the fowls are supplied with an abundance of good sharp grit the food can not thus be prepared, and in consequence the fowl will suffer very much as does a person from an attack of indigestion or dyspepsia.

The natural construction of the fowls' digestive organs points to a seed or grain diet. No provision other than that of assimilation is made for the moisture taken into the crop. The fowls must have water, both to soften the food when taken into the crop and to enable the gizzard to grind it more easily. The hen must also be provided with water to finish the egg which she lays.

Compared with well-rotted barnyard manure, there are 48.60 pounds of phosphoric acid in hen manure to six in barnyard manure; 41 pounds potash to 10 in barnyard manure, and 67 pounds nitrogen to 11 in barnyard manure. The analysis is based on a ton each of hen and barnyard manures.

Recent sales by the government totaling 125,000,000 feet of saw timber in the Olympic National Forest, in western Washington, mark the opening of this hitherto inexhaustible storehouse of timber, estimated to contain a stand of 33 billion board feet.

We have noticed that good dairymen feed their minds as well as their cows.

## LOCAL ITEMS

Hilbert Gwartney, of Indianapolis, was in the city on business today.

G. D. O'Rear transacted business in Indianapolis today.

Hubert Webster, business manager of the university, was in Indianapolis on business today.

Mr. and Mrs. C. A. Kelley and family motored to Danville, Ind., where they spent Sunday.

Harold Comstock was in Indianapolis Sunday to attend the Cleveland-Indianapolis baseball game.

J. P. Allee and John H. Allee motored to Martinsville on a business trip today.

Mrs. W. W. Tucker and daughter, Mrs. Cedric Noble, spent the day in Indianapolis.

Mr. and Mrs. Clyde Randel, of Terre Haute, were here to spend Sunday with James L. Randel and Miss Naomi Randel.

Billy Thompson, Earl Toney and Hi Rudisill returned this morning from a three-days' fishing trip on Big Walnut at the mouth of Little Walnut. The men brought home a fine string of fish, among them being several large channel catfish as evidences of good sport.

Word was received here today of the birth of a daughter to Mr. and Mrs. Charles Peregrine of Artesian, S. D., April 17. Mrs. Peregrine was formerly Miss Desiah Hamilton of this city and is well known here.

W. H. H. Cullen and his daughter, Mrs. Jackson Boyd, went to Plymouth Sunday called by the death of Mr. Cullen's brother, John F. Cullen, whose death occurred Friday. The funeral was held today.

Leslie Ellis, arrested a few days ago on the charge of intoxication, pleaded not guilty and his trial was set for tomorrow. He changed his mind about standing trial on the charge, however, and this morning pleaded guilty.

Elisha Balwin, a farmer residing in Marion township near Filmore, who was arrested on the streets of this city Saturday afternoon and charged with intoxication, was released late that afternoon when he promised to go home. He received some good advice from the mayor.

Rev. Hubert Webster, business manager of DePauw University, an employee of the home for several years, has kindly accepted the invitation to deliver the class sermon at the home at the time of our commencement next June. Rev. Webster is an able minister and the home is truly fortunate in procuring him for the above occasion.—Knightstown Soldiers' Home Journal.

Miss Alma Sheets, of Terre Haute, spent Sunday with her parents, who reside on Central avenue. She is attending Normal School in that city.

Mr. and Mrs. E. E. Caldwell and Mr. and Mrs. W. H. Welch motored to Crawfordsville in the Caldwell machine Sunday, where they were the guests of Mr. and Mrs. W. N. Steele.

Mrs. Grace Wiseman, of Altamont, Ill., is here visiting her parents, Mr. and Mrs. William Grogan, who reside on Wood street.

Mr. and Mrs. James Dunnington spent Sunday in Indianapolis. They are making arrangements to leave within the next few days for Montana, where they will locate permanently.

Miss Nellie Riggs, of Crawfordsville, will come here Tuesday for a several days' visit with her cousin, Miss Louise Abrams.

The Music News, published in Chicago, will send a special representative here this week to write the story of the Indiana State Music Teachers' Association meeting which will be held here.

Prof. W. A. Riley, of Cornell university, who has been here for the past few days visiting his parents, Rev. and Mrs. A. T. Riley, on Hanna street, left today for California where he will take special work in a university of that state. He is a member of the Cornell university faculty.

Mr. and Mrs. H. C. Allen, Jr., and children came from Crawfordsville Saturday to spend Sunday with Mr. and Mrs. H. C. Allen. Mr. Allen, who has recently accepted a position in Crawfordsville on Friday. He returned to Chicago Sunday night. Mrs. Allen and children will remain here for a longer visit.

Automobiles driven by Fred Bryan, the owner of the local transfer company, and Mrs. Fred Goddard of north Greencastle, collided at the turn at the south end of Indiana street Sunday morning. The Goddard machine was badly damaged, having one wheel smashed, the steering gear damaged and the fenders bent. The short turn prevented the drivers from seeing the approach of the other.

Mr. and Mrs. John Henderson, of Lebanon, drove to Greencastle Sunday to spend the day with their daughters. Miss Mary Henderson, who is a teacher in the DePauw School of Music, and Miss Hazel Henderson, who is attending DePauw. Miss Mary Henderson and Miss Bessie Smith returned to Lebanon with them in the car Sunday evening, returning to Greencastle today.

The Woman's Club at its Saturday afternoon meeting elected the following officers for the ensuing year: President, Mrs. W. W. Tucker; vice president, Mrs. B. F. Corwin; recording secretary, Mrs. Harry Maxwell; corresponding secretary, Mrs. Caroline Doll; treasurer, Mrs. R. L. O'Hair; critics, Mrs. Frank Donner and Miss Martha Ridpath; council member, Miss Josephine Donohue; program committee, Mrs. J. G. Dunbar, Mrs. Earl Ellis and Mrs. F. L. O'Hair.

Dr. F. W. Grimm of Cincinnati who will appear before the teachers' association which meets here this week in an illustrated lecture on Wagner's "Tristan and Isolde." Dr. Grimm is an acknowledged authority on the music of Wagner and Greencastle people will have an unusual opportunity to hear him on his chosen subject.

The funeral of D. A. Peregrine, whose death occurred Friday morning, will be held at the home at the corner of Locust and Walnut streets Tuesday afternoon at 2 o'clock. Dr. Demetrius Tillotson, pastor of the College avenue church, will have charge of the services. The burial will be in the Forest Hill cemetery. Word was received here from Mrs. Huldah Lang of Tropic, Calif., that she probably would arrive here today. She is a daughter of the late Mr. Peregrine.

## LOCAL BOYS LOSE TRACK MEET TO ROACHDALE HIGH

The Roachdale high school track team defeated the Greencastle high school athletes in a dual track meet at Roachdale Saturday afternoon. The score was 64 to 36. The Roachdale boys took practically all the track events, while Greencastle did equally well in the field events.

The local lads were handicapped to a great extent in the track events, for the dashes, hurdles and distance runs were all held on the hard streets and the boys were unable to run in spiked shoes to any advantage. They have practiced on a cinder track practically all year and were outclassed when competing with runners who were accustomed to the streets.

Edward Shultz made the best record of the meet, taking the high jump at 5 feet and 5 1/2 inches. He outclassed his opponents and was not forced to extend himself to win the event. He promises to be a sure point winner for the Greencastle team. Ensign also made a good showing, taking the broad jump at 19 feet, 7 inches and the shotput at 36 feet, 7 inches.

School Superintendent Henderson and several students of the high

## Let your Painter make this test

Take equal quantities of "High Standard" Paint and any other brand, apply them on the same kind of surface, and prove for yourself how much better "High Standard" covers and how much farther it goes. Then figure how much less paint it would require to cover your building when you use

the paint of proven performance. You will see that even if it costs more per gallon it will still cost less by the job.

For the paint that gives best results always look for the "Little Blue Flag" on the label. You will get a job of painting that will retain its freshness and beauty and give your building the best protection from the destructive action of the elements. Come in and ask us for information about painting, color cards and booklets.

Jones, Stevens, Co  
Greencastle Indiana.

school accompanied the local team to Roachdale. Coach Lennig made the following statement in regard to the outcome of Saturday's meet, "I am very well pleased with the results of the meet, as it was our first chance to show the merit of our athletes, and in consideration of the fact that it was on a strange field.

The Greencastle point winners are as follows:

Gwin Ensign—First in broad jump, first in shotput and third in the discus hurl.

Edward Shultz—First in high jump and third in shotput.

Joel Denman—Tied for first in pole vault.

Hadley Cammack—Second in broad jump.

Russell Newgent—Second in shotput.

Florice Runyan—Second in 880-lash.

Fred Strain—Second in mile run.

Arthur Lynch—Third in 100-yard dash and third in the 220 dash.

## ANOTHER CIRCUS MAY COME TO GREENCASTLE

It was rumored on the street this afternoon that the Howe's Great London Circus would show in Greencastle May 14. Contracts have been drawn up by the management of the circus and the Big Four railroad company for transportation from this city to Martinsville, and that is believed to be the source of the rumor. Whether or not the circus will be here to show is yet to be determined, for the advance man has not been here to make arrangements for the show.

## OSTEOPATHIC TALKS.

That You May Know of Osteopathy And What it is Doing for Humanity in Greencastle.

(Edited daily by Dr. J. F. Spaunhurst, founder and proprietor of the Spaulhurst Institute of Osteopathy, Indianapolis.)

Cleanliness prevents rust. The best of machinery wears out. Man is a delicate, complex, vitalized machine.

Wisdom is to the mind what health is to the body.

"Nature, the handmaid of God, delights only in perfect humanity."

Osteopaths know the human body as an expert machinist knows his engine. Neglect in the matter of health-getting breeds mischief, causes much suffering and shortens life.

If ill you will do yourself a good turn by deciding without delay to give Osteopathy a fair trial.

The poor man must work to get food for his appetite; the rich man must work to get an appetite for his food.

Lest you continue to slip backward, a little more sand is needed both on the track and in your craw. If you don't know what to do, see the Osteopath.

Now and then Nature gets into a tight place and needs helping out. Osteopathy is needed to set Nature right. Nature works slowly and will defeat the end desired if crowded. Give the Osteopath a fair chance to adjust the body structure, and satisfaction is assured. Over Lyric Theater. adv.

## YOUNG MAN HELD IN JAIL PENDING INVESTIGATION

Dewey P. Knight, the young man taken into custody Saturday because of his queer actions, is now in the county jail where he will be kept for several days pending an investigation by Dr. Jerome King and Dr. C. T. Zarini. These men were called to serve on an insanity commission with Squire Frank on Saturday afternoon, to determine the mental condition of Knight.

The physicians found the young man to be quite ill. He had a high fever and other bad symptoms. Knight will be kept in jail and given medical attention by the physicians for several days. In the meantime the local officers will attempt to get into communication with the parents or relatives of the young man.

Knight acts very queerly but whether his actions are caused by illness or by mental troubles the physicians were not able to ascertain. He came here from Indianapolis about a week ago. During his week here he borrowed at least \$20. from different persons on the plea that he had no money with which to buy anything to eat. He told them he had a job at the university and that he would pay them as soon as he drew his salary.

## IMPORTANT

A New Tariff of Passenger Fares on Interurban trains of this company will become effective on May 1, 1915. Such fares computed at two cents per mile—one-half miles being counted as one cent. Minimum fare is five cents.

As many fares end in odd cents, our patrons will confer a favor on both the company and its employees by purchasing tickets before boarding trains. If this cannot be done, please have the exact change ready. When paying cash you will be given a cash fare receipt, which receipt should in all cases be retained as evidence of fare paid.

By doing this you will materially assist the conductor in collecting his fares, allowing him more time to devote to other duties.

TERRE HAUTE, INDIANAPOLIS & EASTERN
